TIMELINE DETAILS

Design lead responsible for the visualization and implementation of UI solutions from concept to completion for many Time Warner Cable / Charter web properties and products, including the Time Warner Cable Central News and the TV entertainment portal, which had continuously ranked among the top 50 of all internet traffic. Devise contemporary user interfaces for websites, web applications and mobile products using relevant web technologies and best practices.

Interact with vendors, and consultants for the design, prototyping and implementation of web products or validation of new UI/UX technical directions.

Oversee sites' usability audits, customer satifaction surveys, propose new user interaction models for multivariate testing.

Validate and secure brand compliance for all Time Warner Cable/Charter web products on a continuing basis and through various corporate transitional phases.
